

Herbie's Auto Shop

Bailey, Louis, Karissa, & Reese

Our project (recap)

Ruby on Rails Web application for “Herbie’s Auto Shop”

Employees will enter the VIN, Make, Model, Year, OBD code/issue that needs to be fixed, the labor cost, the parts, etc.

It will also store information about the customer, such as a contact number, home address, and name as well info about their cars.

Invoices can be created to display a report

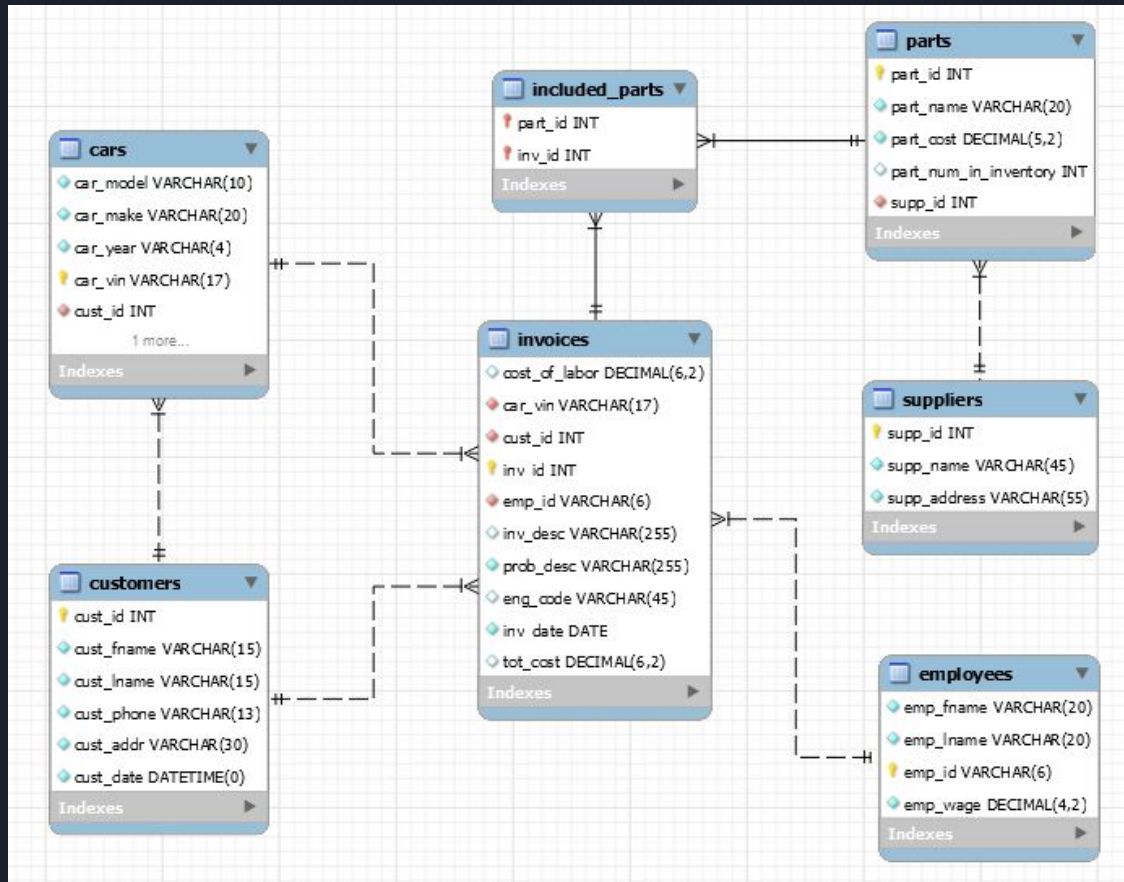

Employees can modify database but only supervisors will be able to delete information

What we have been working on...

- Revised Database
- Looked into admin page
- Research on User Authentication
- Set up Github

Revised Database Structure

No success with RailsAdmin

NAVIGATION

- Cars
- Customers
- Employees
- Included parts
- Invoices
- Parts
- Suppliers

List of Cars

Dashboard / Cars

List + Add new Export Add filter Selected items

Filter Refresh x Export found Cars

Car model	Car make	Car year	Car vin	Cust	License plate	
Taurus	Ford	2004	111111	1	457dh56	i p x e
RSX	Acura	2004	123456789H	1	5749349	i p x e

ActiveRecord::StatementInvalid in RailsAdmin::Main#index

Showing C:/RailsInstaller/Ruby2.2.0/lib/ruby/gems/2.2.0/gems/rails_admin-1.2.0/app/views/rails_admin/main/index.html.haml where line #92 raised:

MySQL2::Error: You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'desc LIMIT 20 ORDER BY parts. desc LIMIT 20 OFFSET 0'

Extracted source (around line #120):

```
118 def query(sql, options = {})
119   Thread.handle_interrupt(::MySQL2::Util::TimeoutError => :never) do
120     _query(sql, @query_options.merge(options))
121   end
122 end
123 else
```

Research on User Authentication

Experimenting with Clearance

Lots of gems you can use with

Ruby on Rails -

You have to know how they work though...

The goal is to have supervisors have more
privileges than regular employees

Demo

Version Control

We are using Github to collaborate on our project and stay up to date with the latest version

What we plan to add soon

Styling, implement authentication, and more!

Any Questions?
